

Lucullus[®] Basic Training

COURSE OVERVIEW

The Basic Lucullus Training program greatly enhances your knowledge on running processes, visualizing key process parameters and analyzing your experimental data. Having thorough knowledge of your software tools will help you become the best in your field. The basic Lucullus Training will focus on tailoring the Lucullus installation to your exact needs, running processes, and optimizing data representation. It culminates with the analysis and reporting of your cultivation, turning your experimental data into useful information.

The Basic Lucullus PIMS Training combines various means of training people to achieve an optimal result: theoretical training, personal interaction with the experienced trainers and practical training in the form of exercises and access to state of the art Online content.

KEY TAKEAWAYS

How Lucullus can help you to optimize your process

How to maximally benefit from the various options for data representation

How to analyze your process data and generate a detailed report

KEY TOPICS

Basic introduction to Lucullus and its main features

Introduction to bioreactor configuration, user authentication & management, Ports and Attributes

Step by step explanation how to create an Operation, define alarms, start a new process, configure graphs and tables

Using the Data load wizard, importing and exporting data, evaluating processes, creating reports

THE COURSE INCLUDES

Online access to all theoretical material used during the course

Certificate of attendance

Dinner (only for the in-house option)

COURSE TYPE	NO. OF ATTENDEES	DURATION	PRICE
online	no limit	2 days	€ 1'500 / person
in-house	3 - 9	2 days	€ 2'000 / person *

* excluding cost of hotel and transportation
