Shape the Future of Bioprocessing

You're Invited to the 6th Learn & Connect Seminar

Step away from standard commercial pitches and dive deep into pure, science-driven innovation. We invite professionals, researchers, and innovators to a dynamic, full-day seminar dedicated to the next generation of upstream bioprocessing.

This experience provides a unique environment designed for genuine knowledge exchange and forward-looking discussions.

Digital Transformation: Explore how advanced modeling, data analytics, and automation are redefining process development.

Cutting-Edge Tech: Gain practical insights into modern bioreactors, analytical devices, and Process Analytical Technology (PAT) solutions.

Interactive Learning: Participate in expert presentations and hands-on workshops that tackle real-world scalability and control challenges.

Meaningful Networking: Connect with industry peers and stay ahead of emerging biomanufacturing trends.

A Powerful Collaboration

Hosted by Getinge – Applikon, a recognized leader in scalable bioprocess equipment, in partnership with Securecell, a pioneer in data-driven bioprocessing. Together, we share a commitment to accelerating innovation through smarter, integrated workflows.

Secure Your Spot!

Whether you are an industry veteran or a rising innovator, this is your platform to learn, connect, and innovate.
