

INNOVATION IS OUR PASSION

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients safely, efficiently, and economically. We innovate groundbreaking measurement and control engineering technologies to improve bioprocessing, medical treatment, and patient health radically. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the foundation for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy.

Continuing steadily on our sustainable innovation path and growth journey, we are looking for a

FRONTEND SOFTWARE ENGINEER

for our Biotech business

Our software engineers develop next-generation technologies that change how biopharma digitizes and automates bioprocess development to fulfill its purpose and bring highly demanded new medications to patients. Lucullus® and our Web-Applications are constantly being developed and improved as they need to handle different kinds of information from innumerable sources within highly complex and constantly evolving environments. Our vision is to maintain this leading position and stand out significantly from all other bioprocess solutions.

YOUR PROFILE

Among your responsibilities, you will:

- Develop and maintain frontend applications using modern web technologies and frameworks.
- Collaborate with product owners, designers, backend developers, and QA engineers to deliver high-quality software solutions.
- Participate in the entire software development lifecycle, including requirement analysis, development, testing, deployment, and maintenance.
- Follow coding standards, best practices, and quality guidelines in frontend development activities.
- Contribute to code reviews and support continuous improvement initiatives within the development team.
- Stay updated with frontend technologies, tools, and development practices to continuously improve technical skills and project outcomes.

Among your skills and qualifications, you bring:

- 5+ years of experience in Frontend development.
- Good knowledge of frontend technologies (HTML5, CSS, TypeScript, Vue.js).
- Experience working in Agile/SCRUM environments.
- Experience collaborating with cross-functional teams in software development projects.
- Knowledge of backend technologies (SPRING) is a plus.
- Experience with automation/communication protocols as well as (bio-)process engineering is an advantage.
- Knowledge of Windows and Linux operating systems.
- Experience with the Atlassian tool suite is highly welcome.
- You are goal-oriented, work well independently, use your strong problem-solving skills in collaboration with the team, and communicate well in an international and intercultural setting.
- Ability to thrive in a fast-paced Agile environment, adapting quickly to changing requirements, priorities, and technologies while maintaining high-quality deliverables.
- Fluent English is required.
- Valid work permit for Portugal. Please indicate your current work authorization status.

Only direct applicants (not via third parties such as recruitment agencies) will be accepted.

OUR OFFER

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!

Why Join Us?

Purpose: Be part of our team developing products and software which are supporting health and well-being for mankind.

Impact: Shape the future of our nearshoring capabilities and contribute to our global success.

Innovation: Work with cutting-edge technologies and collaborate with diverse teams.

Flexibility: Enjoy a hybrid work option as a mix of remote work and office presence.

If you're ready to innovate and make a difference, apply now! Send your resume and a cover letter outlining your relevant experience to hr@securecell.ch
