

INNOVATION IS OUR PASSION.

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient, and economical way. We innovate ground-breaking measuring and control engineering technologies to improve bioprocessing, medical treatment, and patient health radically. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the foundation for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy. Continuing steadily on our sustainable innovation path and growth journey, we are looking for a

JAVA SOFTWARE ENGINEER

for our Biotech business

Our software engineers develop next-generation technologies that change how biopharma digitizes and automates bioprocess development to fulfill its purpose and bring highly demanded new medications to patients. Lucullus® and our Web-Applications are constantly being developed and improved as they need to handle different kinds of information from innumerable sources within highly complex and constantly evolving environments. We aim to maintain this leading position and stand out significantly from all other bioprocess solutions.

YOUR PROFILE

Among your responsibilities, you will:

- Contribute to backend development across the software development lifecycle, including requirements analysis, design, implementation, testing, deployment, and maintenance.
- Work closely with senior developers, architects, and cross-functional teams to deliver reliable, maintainable, and scalable backend solutions.
- Apply relevant design patterns and architectural principles to build clean and robust software.
- Follow coding standards, best practices, and quality guidelines to ensure clean, secure, and efficient code.
- Participate in code reviews, troubleshooting, debugging, and performance improvements.
- Stay updated with emerging trends, technologies, and methodologies in backend development, and apply them where relevant in the project.

Among your skills and qualifications, you bring:

- 4+ years of experience in Java development.
- Very good knowledge of the Spring framework and RESTful services.
- Experience in working on big projects with multiple SCRUM teams.
- Knowledge of database development is advantageous (JDBC/Hibernate/JPA).
- Knowledge of design patterns and software architecture principles is advantageous.
- Knowledge of frontend technologies (HTML5, CSS, JavaScript, Vue.js) is a plus.
- Experience with automation/communication protocols and (bio-)process engineering is an advantage.
- Knowledge of Windows and Linux operating systems.
- Experience with the Atlassian tool suite is highly welcomed.
- You are goal-oriented, work well independently, use your strong problem-solving skills in collaboration with the team, and communicate well in an international and intercultural setting.
- You communicate effectively in English
- Candidates must have the legal right to work in Switzerland. Please indicate your current work authorization status.

OUR OFFER

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!

Why Joining Us?

Purpose: Be part of our team developing products and software which are supporting health and well-being for mankind.

Impact: Shape the future of our nearshoring capabilities and contribute to our global success.

Innovation: Work with cutting-edge technologies and collaborate with diverse teams.

Flexibility: Enjoy a hybrid work option as a mix of remote work and office presence.

If you're ready to innovate and make a difference, apply now! Send your resume and a cover letter outlining your relevant experience to hr@securecell.ch

JOB LOCATION

This position is based in our office in the city of Urdorf, Switzerland.
