

INNOVATION IS OUR PASSION

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient, and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment, and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the foundation for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy. Continuing steadily on our sustainable innovation path and growth journey, we are looking for talented

SOFTWARE SOLUTION ENGINEER

for our Information Technology Department – Software Architecture team

As part of a development team, you are a key driver for the (further) development of innovative products in the biotech area. You take the requirements, based on which you design state-of-the-art standards - either for standalone software or entire systems following best practices. At the beginning, you will be entrusted with the conceptual development of Securecell's new disruptive product. Later on, other products will follow. You will advise the internal and external specialist teams (co-development approach) and make decisions that consider the success of the entire company. You define standards for methodologies and development approaches, as well as create the corresponding documentation.

YOUR PROFILE

- Completed studies (FH / Uni / ETH) in engineering, preferably IT/computer science.
- At least three years of experience in **software development**.
- Strong expertise in software development with experience in enterprise-grade applications. Hands-on mindset.
- Ability to work across teams, collaborate effectively, and translate architectural decisions into technical solutions.
- Strong problem-solving skills, with the ability to navigate complexity in a large technical stack.
- Experience with **DevOps practices, CI/CD tools, automation frameworks, and infrastructure-as-code**.
- Proficiency in Linux environments, particularly with **LTS distributions and Oracle Linux** (preferred but open to alternatives).
- Experience working with enterprise databases, particularly Oracle DB and PostgreSQL.
- Solid understanding of security best practices, compliance, and secure coding methodologies.
- Industry experience in Medtech/Biotech is not mandatory; however, there must be a strong interest and awareness that the environment is regulated.
- Experience in (bio)process technology is a plus; however, it is not a prerequisite.
- A valid work permit is required, and only direct applications will be taken into consideration (no agencies).

OUR OFFER

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!

Please submit your detailed curriculum vitae to hr@securecell.ch

JOB LOCATION

Securecell headquarters are in Urdorf (Zurich), Switzerland.
